Leon, Iowa 50144

As you may know, the RCRA Iowa Section of EPA Region VII recently co-sponsored used oil management workshops at seven locations in Iowa. The primary purpose of the workshop was to educate used oil generators on the Federal hazardous waste management regulations for used oil and to encourage the recycling of used oil.

To further these efforts, EPA is providing information to facilities which are collecting used oil to help identify management alternatives. Your facility has been identified by the IDNR as a used oil collection center. Enclosed is a fact sheet with information on regulatory requirements and management options.

It is our intent that this letter be used as an educational tool to help increase everyone's awareness of used oil management practices. If you have any questions about this letter, please call the RCRA Iowa used oil helpline at (913)- 551-7036. The hotline will be available through August 4, 1995.

Sincerely,

  
James V. Callier  
Chief, RCRA Iowa Section  
Air, RCRA, and Toxics Division
